Introduction

The PBS Capital Construction Snapshot is a mapping tool that allows users to locate all active, GSA capital construction projects across the country and its territories. There are no predefined searches, but users may use the map tools to navigate or search for locations. The tool is accessible to users via computer (Mac or PC), smart phone, or tablet.

The map allows users to view specific information on each project such as:

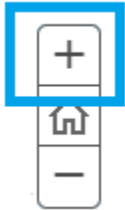

- Building Name
- Project Name
- Total Requested Funding

The shortcut to the PBS Capital Construction Snapshot is www.gsa.gov/capitalconstruction.

Navigation and Search

The PBS Capital Construction Snapshot does not provide predefined searches, but users may use the map tools to navigate or search for locations. There are multiple navigation and search tools including the ability to:

Zoom In: Zooms the map in.

Home: Zooms the map out to the “Home” view.

Zoom Out: Zooms the map out.

Locate Me: Zooms the map to your current location. Location must be enabled.

Search: Allows users to search by location address.

Search Results

Search results will populate projects in the following phases: planning, execution (design), execution (construction), and recently completed.

Project Information

Project information will include building name, project name, location information, and requested funding amount.
